

I as an XM radio listener benefit from the weather forecast and road conditions because I travel 406 miles every month and I need to know how the road conditions are. So, I don't think that the FCC should tell me what I can or can't listen to. I want the FCC to reject the NAB'S petition 04-160 and support XM'S ability to support provide the kind of programming I demand and deserve. I fought for this country for these rights, not to have them taken away.
